**Flathead Nat'l Forest Information**

**758-5204**

**Home Ranch Store**

**888-5572**

**North Fork Hostel 888-5241**

## How to Prepare for an Emergency

- Write down the GPS coordinates or the section, range and township of your property on the front of this form; post it near your telephone or in a location your family agrees upon.

### **This information is used by the ALERT helicopter team to locate your property.**

- Section, range and township can be found by referring to your title deed, or by locating your property on a Flathead National Forest map.
- Drive with your family to ALERT landing sites and sites with medical facilities. Discuss which are closest and which to use in case of an emergency.
- If your cabin/house doesn't have a phone...determine where the closest one is (i.e. neighbor, store etc.)

## Prepare a **Family Disaster Plan**, which should include:

- What to do, who to call and where to take a victim in case of medical emergency.
- What to do, who to call and where to seek safety during a forest fire.
- What items of value need to go with you: medications, papers, laptops, ID cards, etc.
- A designated meeting place near your home that will be a safe distance from a forest fire or other hazard.
- A designated safe meeting place on the North Fork in case you can't return home.
- A designated out of area friend to check in with in case your family becomes separated.
- A good first aid kit.
- A good first aid manual.
